

## **Interreg NWE Partner Search: Social Innovation Project**

Chwarae Teg (Wales) is looking for partners to design and deliver a transnational project supporting women entrepreneurs.

Chwarae Teg (Fair Play) is Wales' leading economic development organisation and has been established for 25 years. We have a dedicated Research and Policy Team and run a major ESF and Welsh Government funded project – Agile Nation2. For further information on what we do, visit [www.cteg.org.uk](http://www.cteg.org.uk)

The NWE project we are proposing would be multi-faceted, bringing in expertise from around North-West Europe and the knowledge and experience of Chwarae Teg. It would incorporate:

- An online portal accessible to women entrepreneurs. This would have an interactive peer support function
- A training programme (accredited) to boost trainees confidence in their business; incorporating short workshops on helpful topics such as marketing, networking, managing finance etc.
- Training for financial institutions on having more gender awareness and the additional issues women often face in terms of finance when starting up a business. Recognition of our training course as being 'finance ready'
- Promotion (using case studies and a strong business case) of the benefits of co-working space in larger organisations and an award for offer of space and minimum criteria in place
